PROYECTO VALLE DE CACAULAPA
CATALOG FORM

DATE: 12 July 2005

LOT NUMBER: 598AK/022

SUBSTANCE: Stone

OBJECT: Mano

CATALOG #: 598AK/022-3

MULTIPLES? N DRAWN BY:

CATALOGED BY: 22

EXCAVATOR: 22

DIAMETER (only if item is basically circular; take average):

HGT/LENGTH: 17.2cm

WIDTH: 7.4cm THICKNESS: 5.9cm

VERBAL DESCRIPTION:

This is a whole partial mano. If a partial mano, it is an end a midsection.

The material is: vesicular basalt - other (describe or name) -

In cross-section, this item is: round - oval - square - rectangular - multi-sided . If multi-sided, how many?:

How many working surfaces/areas are visible: 3

The working surfaces/areas are: smoothed only - show use-related polish - can't tell.

The working surfaces/areas extend: completely - partially across the item as preserved.

The working surfaces measure (do each separately): 17.2cm x 2.5cm

17.2cm x 5.2cm
17.2cm x 4.3cm

The end-to-end shape of this mano is: equal in width throughout - smaller on the end(s) than in the middle. If it is larger in the center, give the dimensions or diameters:

Minimum: 4.3cm x 6.0cm

Maximum: 7.5cm x 6.2cm

If an end is preserved, the end shows: pecking - grinding - striations - a smooth surface - a polished surface - can't tell.

The sides show (mark all that are appropriate): pecking - grinding - striations - smoothed areas - polished areas

If the item is broken, the broken end: is sharp - is somewhat sharp, but appears eroded - has been battered or chipped.

If the end seems to be battered or chipped, this seems to be the result of: accident/depositional conditions - deliberate use - cannot tell.

Item is: not drawn - drawn (where?) photographed

Comments:

This well formed metate was formally shaped on all sides before use began. It was not used too much before it broke, because no sides are flat.
